

REMARKS

I. NEW CLAIMS 57-76.

The Applicant has added claims 57-76. The Applicant notes, in particular, that in Claim 57, for example, the step of transforming, by the input/output control unit, of the digital data is newly presented, and is not taught by the references discussed by the Examiner in the Office Action having a mailing date of December 24, 2003 (Paper No. 25). The support for this limitation may be found, *inter alia*, in the Specification at page 21, ¶ 3. Similarly, claim 67 recites an input/output control unit transforming the digital data.

Likewise, dependent claim 64 includes digital data being computer commands forwarded to the input/output control unit which processes the commands to tailor the display images. The support for the limitations of claim 64 may be found, *inter alia*, in the Specification at page 51, ¶ 2. The limitations of claim 64 are also not taught by the references discussed by the Examiner in Paper No. 25. Similarly, claim 74 includes limitations paralleling those of claim 64.

Respectfully submitted,  
WINSTEAD SECHREST & MINICK P.C.  
Attorneys for Applicant
